DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-34 and 39-116, drawn to a system for communication information related to the position of a mobile, classified in class 455, subclass 456.1.
 - II. Claims 35-38, drawn to an information type, classified in class 455, subclass 466.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a header defining the information type. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, including claims 2-8, 10-17, 19-22, 24-28, 30-34 and 40-43 direct to a position of the mobile station.

Species II, including claims 44, 47, 52-59, 88, 111 and 114 direct to a current and past positions of said mobile station.

Species III, including claims 45, 46, 70-73, 80-83, 89, 90 and 107-110 direct to system, network, user zone and registration zone identification.

Species IV, including claims 48 and 92 direct to sector status.

Species V, including claims 49-51, 60-66, 74, 76, 84, 93-101, 103, 112 and 115 direct to pilot signal.

Species VI, including claims 67, 77 and 104 direct to an estimate of received signal power.

Species VII, including claims 68, 69, 78, 79, 105 and 106 direct to the transmission power level.

Species VIII, including claims 75, 85-87, 102, 113 and 116 direct to the position of the base stations.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 9, 18, 23, 29 and 39 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
